Creative Section

The creative track is sponsored by Adobe and there were three things they mentioned that our project should have or could have to place up above…

Main Objectives:

- New and interesting perspective: Development of user-centric and innovative projects.
- Curiosity about User: Encouragement of curiosity in creative building processes.
- How we can build something for the user that is unique
- Emphasis on mentorship and collaborative excellence.

Ideas:

AI-Assisted Project Management Tool

- Development of a personal tool for tracking project ideas and progress.
- Integration of voice recordings for updating task status and archiving records.
- User-controlled workflow to maintain creative ownership over project outcomes.

User-Centric Idea Generation Strategy

- Refusal of automated AI suggestions to preserve user agency.
- Prompting users based on historical data and past achievements.
- Facilitation of creative thinking through reflective questioning techniques.

Structural Breakdown of Project Features

- Decomposition of complex projects into distinct parts and features.
- Organization of features into manageable tasks and technical stacks.
- Visualization of project progress similar to a detailed notebook.

Features

- Minimalist design
    - 4 button menu bar

- Deep Thinking AI that accepts audio conversations
- Memory capability
- Organized thoughts/ideas tracking
- Project Visualization
- Project decomposition for distinct features
- User Authentication
- Sleek and modern Animation
    - Cool tones
    - Shifting gradients of bubbles similar to Gemini but full screen
    - Menu bar: shifting gradients not same to background (translucent appearance with added shadows on the edges)
- Users introduce themselves and add their personalized portfolio and other comments about themselves or work
- File processing
